PROFESSIONAL SUMMARY

Software Development Engineer intern who cares about the craft: clean, tested code shipped to production. Built 4 production microservices (Node.js, Express.js, PostgreSQL, Redis, Kafka, Docker) in a live commercial product, backed by 150+ DSA problems solved in Python. Experienced in REST API design, code reviews, debugging, and Agile collaboration with frontend, Android, and backend teams. Passionate about building developer-focused tools and AI-powered products; builds faster with AI tools (Claude Code, GitHub Copilot, agentic workflows).

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), SQL
Backend: Node.js, Express.js, REST APIs, Microservices, Apache Kafka, Event-Driven Architecture, JWT, RBAC, Google OAuth, Prisma ORM
Databases: PostgreSQL, MongoDB, Redis
Tools: Docker, Docker Compose, Git, GitHub, Linux CLI, Postman, API Testing, Debugging, Cloudinary, Resend, Render, Vercel
AI: Claude Code, GitHub Copilot, Agentic AI Workflows, LLM Agents, LangChain, OpenAI API, Tool Calling, ATS Resume Matching, Prompt Engineering, Generative AI
Core CS: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design, Distributed Systems
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI

EXPERIENCE

Backend Software Engineer Intern - ShriNeo Vittiyam Pvt. Ltd. Mar 2026 - Present

- Designed and shipped 4 production-grade microservices (Authentication, Loan Application, Fraud Detection, Notification) with Node.js, Express.js, PostgreSQL, and Redis, following Clean Architecture.
- Built Authentication Service with JWT, RBAC, and OTP verification, sustaining 120ms average API response time (Postman).
- Cut repeated database lookups by ~40% by adding Redis caching for token and session validation.
- Built Loan Application Service (PostgreSQL, Prisma ORM, Redis); tested and debugged against 100+ test loan applications.
- Developed Kafka-based event pipelines for fraud detection and notifications, processing 500+ events with zero failures.
- Hardened REST APIs with request validation, rate limiting, token blacklisting, and structured error handling.
- Cut local setup time from 30 min to under 10 min with Docker Compose on Linux; wrote technical documentation for APIs and setup.
- Took ownership of services end to end and raised issues early, collaborating with frontend, Android, and backend engineers through API design discussions, code reviews, and Agile sprint planning.

PROJECTS

JobPilot AI: AI-Powered Job Discovery & ATS Matching Platform | React.js, Node.js, Express.js, MongoDB, Cloudinary, Resend, Google OAuth Live Link

- Built a mobile-first, full-stack job platform with three role-based experiences (Job Seeker, Recruiter, Admin), using JWT authentication with email/password and Google Login.
- Designed an agentic AI pipeline that discovers jobs and matches them to a user's resume, so seekers don't have to search listings manually.
- Implemented an ATS-style scoring engine that compares resumes against job descriptions and returns a match score, so users can see how well they fit before applying.
- Built an automated email alert system with Resend that notifies users when a job crosses their match-score threshold, keeping alerts relevant.
- Integrated Cloudinary for resume uploads and designed a responsive, touch-friendly UI with simple navigation; deployed on Vercel.

Multi-Agent Research Studio | Python, Streamlit, LangChain, OpenAI API, LLM Agents Live Link

- Built a multi-agent system with LangChain and the OpenAI API in which specialized LLM agents use tool calling to split a research query into subtasks, gather information, and synthesize one structured answer.
- Developed an interactive Streamlit interface so users can submit queries and follow results in real time.

PROBLEM SOLVING & ACHIEVEMENTS

- Solved 150+ Data Structures & Algorithms problems in Python on LeetCode, building strong problem-solving and coding fluency.
- Shipped multiple production-grade backend microservices in a live commercial product.
- Certifications: Machine Learning (Coursera); Software Product Management (Coursera).

EDUCATION

Vivekananda Global University - B.Tech, Computer Science Engineering (CGPA: 7.20) Aug 2023 - May 2027
